CONSUMER GUIDELINE

ACURA believe in customer first. We believe in customer satisfaction. for ACURA, Its responsibility does not end by manufacturing quality products. A team technicians across India provide prompt after-sales service to its customers ACURA also provides unique support to its customers during the designing phase. Some of the general instauration carefully followed by the customers to get optimum result of the product.

GENERAL INSTRUCTION

- Use 25mm pipes rather than 20mm pipes to ensure better water flow and to overcome reduction in diameter of pipeline due to scaling inside the pipeline. For better performance of the product, we recommended water pressure should be between 2.5 bar to 3 bar.
- Keep the minimum number of bends in the pipeline and make it travel straight and vertical as far as possible.
- All the supply must have vent pipes. These vent pipes help in removing air locking in the water supply to give a flow of water from the fittings.
- Test the working of all the concealed fittings installed on a high pressure for leakage before plastering or fixing the line.
- Clean the aerators provided in the items at regular intervals for a perfect foam flow of water from the fittings.
- Place the outlet point in the overhead tank at least 25cm above the ground level of the tank. this prevents the flow of the working parts. Clean the tank thoroughly before the supply starts. It is suggested that the overhead tank must be cleaned at regular interval to avoid deposition of foreign particles.
- Do not use strong harsh cleaning agents containing abrasive, acids detergents as this may cause damage to the chromium finish.
- To protect the finish from fittings from dirt stains and other damages, cover them with cloth/polypack after their installation till they come into actual use.
- It is suggested that center to center distance for hot and cold inter for all type of wall mounted mixers should be maintained at 165mm in which case any of our wall mixers from different ranges can be easily installed without any problem.
- Insist on genuine spares from the company's local service center or its authorised stockist in case of repair or replacement.
- For any type of technical or service assistance, please contact the nearest ACURA branch, dealer, or area representative.
